

“Tulsa Police nab theft suspects of industrial plant that have stolen roughly one million dollars of copper and equipment”¹

Don't let your facility become a headline. Protect high dollar inventory, equipment and raw materials with 24/7 AI-augmented monitoring and live lookouts.

THE BLUE EYE RVM SOLUTION

MONITORING

Customized monitoring solution, Blue Eye's intelligent platform is designed to perpetually learn and adapt to changing security conditions.

DETECTION

Blue Eye continuously analyzes data from multiple sources, such as surveillance cameras and sensors, to identify potential threats before they mature into acts of crime.

ANALYSIS

Once a potential threat is detected, Blue Eye's team of security experts intervenes and engages based on pre-configured protocols.

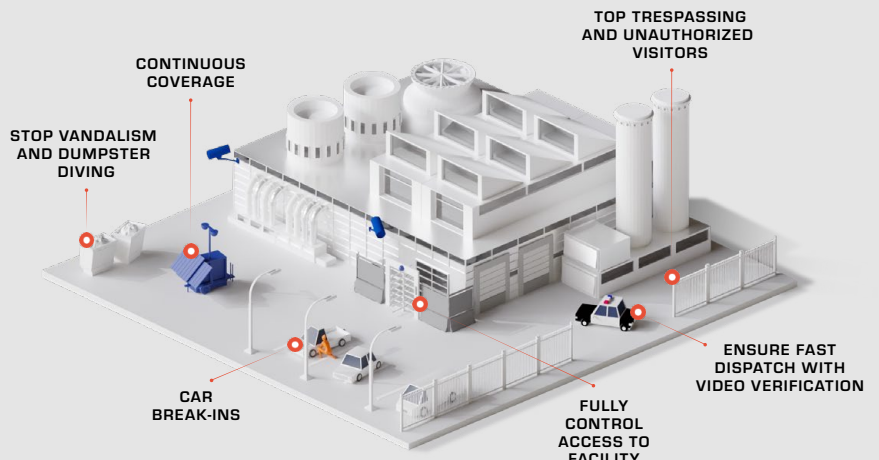

RESPONSE

In the event of a security breach, a customer response plan is deployed, including high decibel speakers, onsite security teams or dispatch to police.

REPORTING

Rich reporting capabilities aggregate dozens of data points, providing comprehensive incident reports, BOLOs, and site activity summaries.

How does it work? Schedule a demo

Blue Eye's proprietary platform leverages advanced AI to detect anomalies in live building video feeds, identifying potential security threats like **unauthorized individuals, suspicious behavior, loitering, and attempted theft.**

When an active threat is confirmed, one of our skilled video surveillance technicians immediately intervenes, addressing the subject directly through on-site speakers with a tailored, impactful message, such as: *"You in the black hoodie, you're being recorded. Put down what you're holding and leave the premises now, or authorities will be contacted!"*

In 99% of cases, this direct approach causes the individual(s) to leave, preventing the crime on the spot. Should the subject remain undeterred, our technician promptly initiates a dispatch and continues to manage the situation until it's fully resolved.

INTELLIGENCE, TRANSPARENCY AND MOBILITY – ALL IN ONE

AIPX HARDWARE

At the heart of Blue Eye's cutting-edge security platform is our locally deployed, thin-client hardware, designed to provide seamless integration with your existing onsite systems. By operating directly on location, this intelligent hardware ensures ultra-fast processing of our AI-enhanced detection and recognition models, delivering split-second accuracy and responsiveness.

Our AIPX platform supports both analog and digital systems, making it versatile and adaptable to virtually any security infrastructure. This compatibility ensures a smooth transition, maximizing your current investment in security technology while enhancing it with next-generation capabilities.

NO OTHER SERVICE COMES CLOSE. BUT WE'LL COMPARE IT FOR YOU ANYWAYS.
